

A Smarter, Deeper, **AI-Powered** Health Risk Assessment Platform

Designed for corporates, insurers, and population health programs to drive better health outcomes.

The Challenge

Most traditional health assessments focus on isolated risks or lack a structured clinical approach. This results in incomplete views of individual health and missed opportunities for early intervention.

Our Solution

Our next-generation HRA platform delivers a comprehensive, multi-layered health screening experience.

Guided by AI and structured into three intuitive levels, it enables organizations to identify at-risk individuals early, improve decision-making, and support proactive health strategies.

Built For

Corporate Wellness Programs

Insurance Risk Stratification

Population Health Campaigns

Preventive Health Camps

STRUCTURED, STEP-BY-STEP SCREENING

LEVEL 01

General Health
Info, Lifestyle Habits,
Risk Indicators

LEVEL 02

Past Medical History,
Surgical Records, Family
History, Genetic & Cancer
Risks

LEVEL 03

Cancer Screening, Heart
& Stroke Risk, Cognitive
& Neurological Health,
Critical Events

AI + Clinical Intelligence

- Real-time risk flagging based on user inputs
- Clinical decision support tools for doctors
- Dynamic question flow based on responses
- Enables early detection and personalized care paths

● PLATFORM HIGHLIGHTS

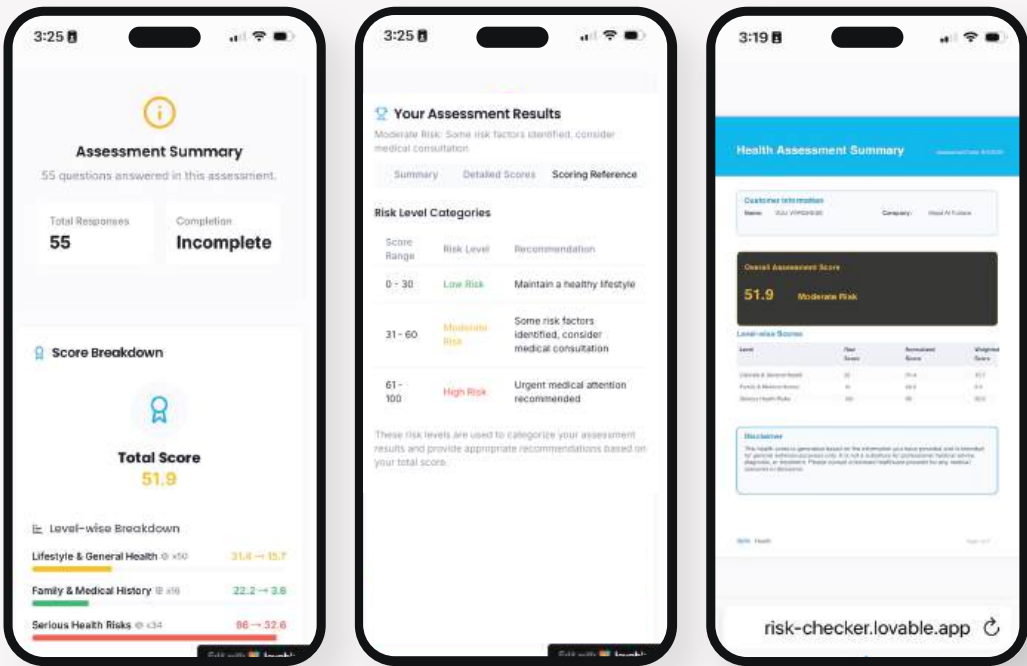

3-Level Health Risk Assessment

AI-Powered Risk Analysis

Doctor Review and Feedback

Corporate & Admin Dashboard Access

Web & Mobile Compatibility

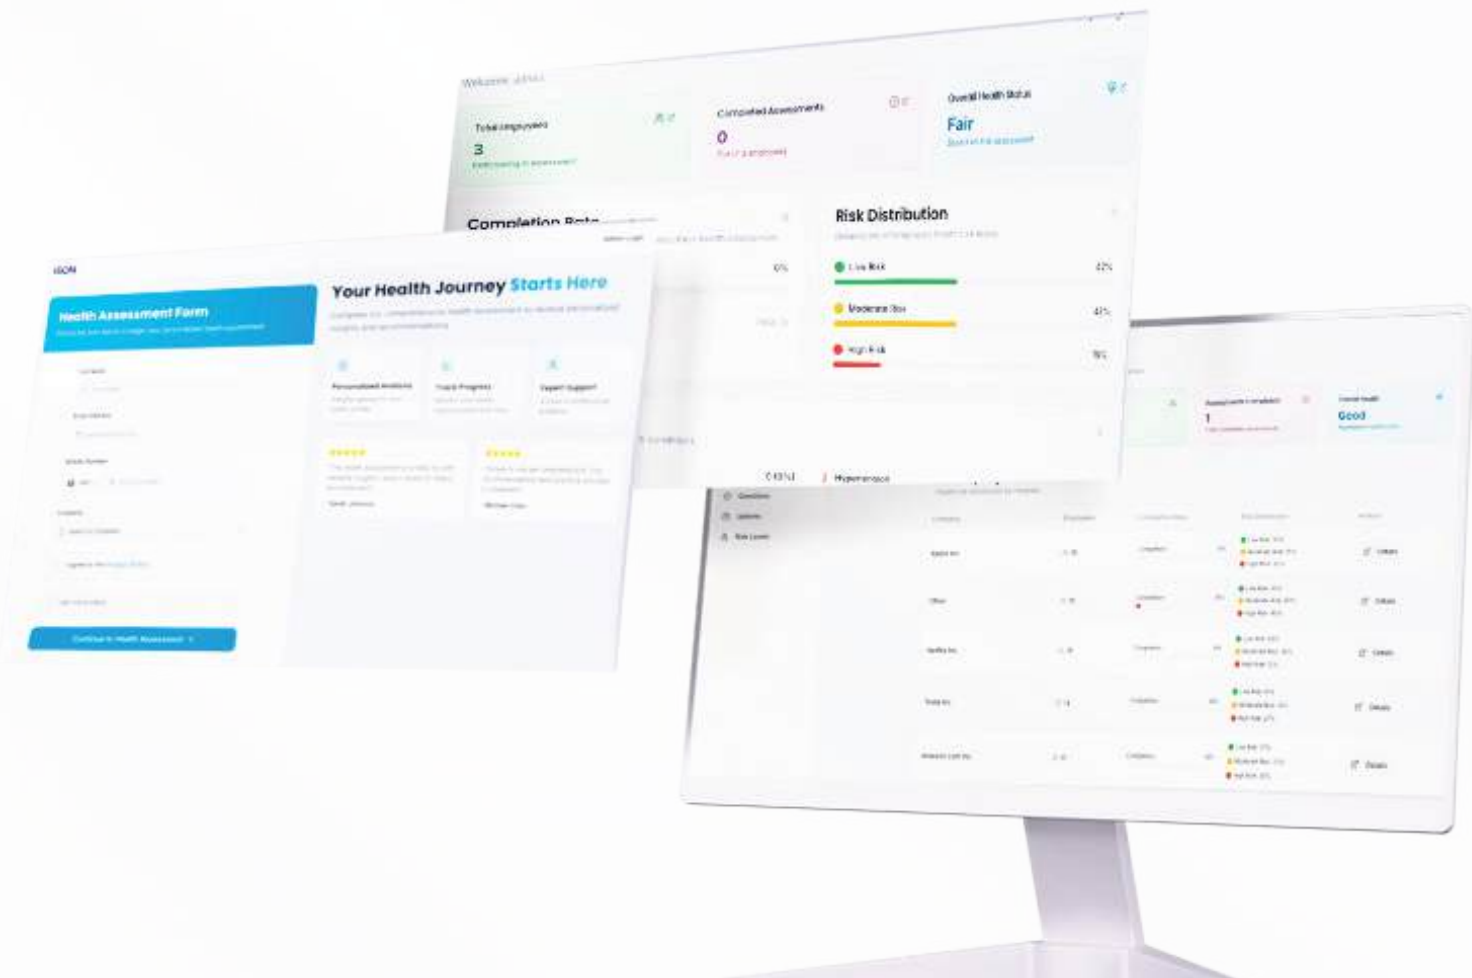

● CORPORATE DASHBOARD

Overview of population health risks

Track assessments by department, region, or demographic

Export reports for strategic wellness planning

Plan targeted interventions based on data-driven insights

WHO BENEFITS AND HOW

EMPLOYERS

Improve employee wellness, reduce sick leave, boost engagement

INSURANCE TEAMS

Smarter underwriting and population-level risk tracking

DOCTORS

Time-saving risk insights and guided clinical pathways

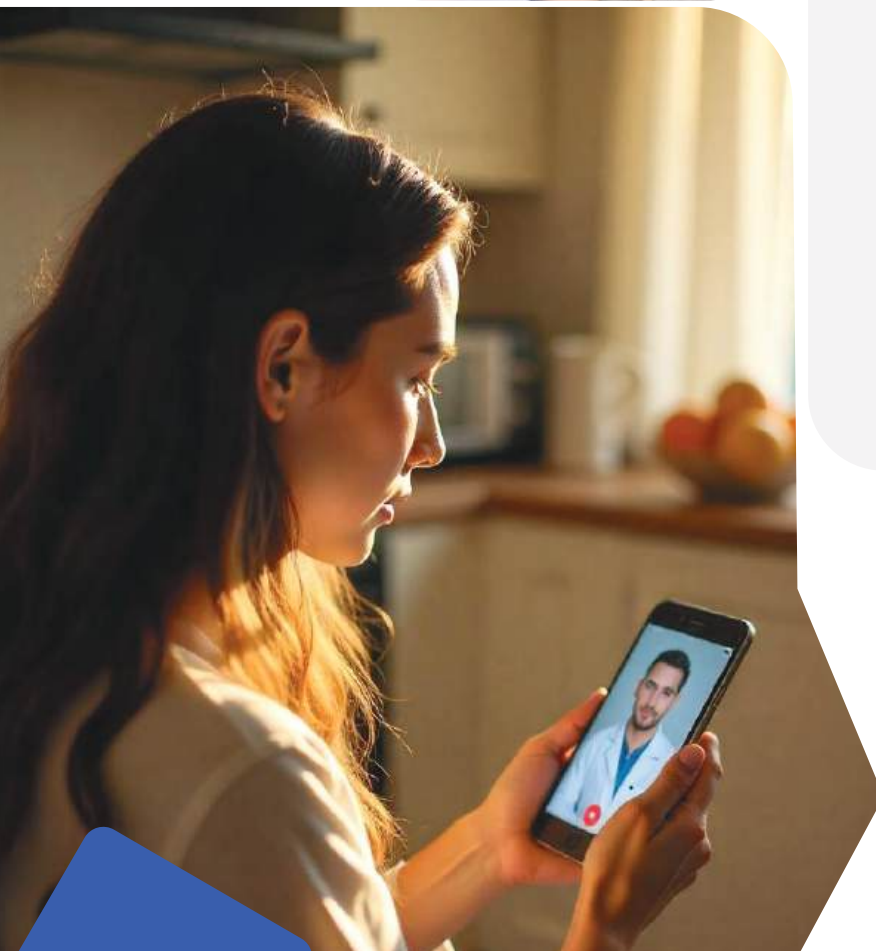

PUBLIC HEALTH

High-volume, structured, meaningful health screening

WHY IT WORKS:

- Covers multiple risk domains in a single journey
- Personalized insights for participants
- Sophisticated backend for corporate and clinical use
- Easy to deploy in workforce or public settings
